

MERITS

A RECHARGEABLE HEAT BATTERY

FIRST MERITS NEWSLETTER 7-6-2013

Dear relation,

with this email you receive the first MERITS newsletter. The MERITS newsletter is intended to appear on a regular basis semi-annually, giving you the latest on the MERITS project progress & developments, publicity & publications, and downloads. Today a first version includes the introduction of our website (www.merits.eu), and a short note on the start events of the project.

Although this first newsletter only contains some basic information, it is of course an open invitation to check our website and to see what's new on compact thermal energy storage research and development. Please do not hesitate to forward this email to anyone interested in the fields of solar energy, compact sustainable energy storage systems, product development and business creation.

Enjoy!

EVENTS

4TH EUROPEAN CONFERENCE ON RENEWABLE HEATING & COOLING

We hope to be back soon with the first hands-on results on heat battery development and testing achievements. In the mean time, check our website, or contact us at info@merits.eu!

with best regards,
The MERITS Team

The research leading to these results has received funding from the European Commission Seventh Framework Programme (FP/2007-2013) under grant agreement No ENER/FP7/295983 (MERITS).
