

MERITS

A RECHARGEABLE HEAT BATTERY

SECOND MERITS NEWSLETTER - JANUARY 2014

In this second MERITS newsletter we want to start by wishing you all the best for 2014!

After the enthusiastic start of the MERITS project now already more than one year ago, the first results are now gradually reaching the greater public. Several publications were issued on system, component, and material level, and the first MERITS film-item has been released! Besides a lovely overview of the university of Lleida, the town, and its test site, it gives a comprehensive overview of the MERITS project and its goals and ambitions. The film item along with other MERITS news can be found below.

We hope you enjoy our second newsletter, and again wish you all the best for the New Year.
